

SkySeeker - RES

Details

SkySeeker by RES !

A completely new ride built by Swiss manufacturer RES and designed together with Amusement-rides.com team.

SkySeeker is a swirling swing ride for big and small. The suspended seats are balanced and supported to trigger seat rotations as they swing outside and gain speed.

The harmonized movement, various speeds combined with the rotation make this attraction unique.

The ability to interactively stop the seat rotation at any time during the ride is optionally available.

Built by order.

Full details available upon inquiry.
